VB1, VB1T Voltage Boosters

Rev. DSVB1 - A17F

Overview

• These units convert a 12VDC-24VDC input into a 24VDC output.

VB1
- Modular connector/cable assembly facilitates ease of wiring.

VB1T
- Screw terminal block. (Wire Gauge 14-20AWG).

Specifications

- Converts a 12VDC-24VDC input to a 24VDC output.
- 24VDC @ .75 amp output.
- Power LED.
- Electronically filtered and regulated output.
- High impact insulated housing.
- Built-in overload protection.

Dimensions (approximate): 1.625"L x 2.375"W x 1"H

Applications

- Compensates for voltage drop due to long wire runs.
- Power for 24VDC Access Control devices from a 12VDC power source.

Access Control Application:
